### Introduction:

#### Dream for Swarnimkal,

- We will be financial capital in the world.
- We will be the largest economy in the world.
- We will be largest market base.
- We will be the Adhyakmik capital.
- We will be safest country in the world.
- We will rise towards Vishavaguru.
- In short, we will be world capital in all aspects (it is difficult together will can achieve this goal).

Education will play a pivotal role, it is the foundation stone, which can make our Journey towards for vikshit bharat at 2047 very fruitful

- Current Scenario (Gap in our education system):
- Our education system is more exam centric than skill centric.

There is lot of pressure (peer pressure, family pressure, relative pressure, pressure from coaching center, etc.) on students to perform (i.e. to score good % of marks). But we have not taught this children's, how to tackle these pressures. Marks can be achieved in many ways for e.g by memorizing content without understanding it or etc.

To Improve the education system, we need focus on some important aspects that can bring quality, integrity and innovation in our education system:

- Skill based education, a blend of practical as well as theoretical training and assessment systems from school days.
- Being professional level, we are getting different types of training which should be a part of our education
- leadership training
- man management
- how to dealt with difficult situation & handle pressure
- habits of highly effective peoples and etc.) for career development.
- Right brain education program, it is specifically design for early childhood learning
- It enhances innovation and creativity, helps to build photographic memory
- It boots speech and language skills, power social and emotional skills
- It backs holistic child development during early days.
- Holistic learning for children's:
- Religious education does not mean to study about some religions. We are the oldest civilization in the world. We have the oldest cultural heritage in the world.
- Study of our oldest civilization, our heritage, ideals of our society (i.e either spiritual or non-spiritual). Einestin said once Bhagavat geeta has all the answers to questions of life.
- Study's about rama's life, krishna's life or jesus life or study of any other Spiritual leader could be very important to pave foundation stone in life of each and every student.
- Apart from school, responsibilities lie upon parent and society also for the holistic development of children.

We need to think above religion, caste, greed, sex etc., to give proper education of our rich cultural heritage of our country. We need to thought Bhagavat Geeta to the children's, it is

not a religious book but it is way to live a life. It gives answer answers to the many unsolved problems.

I believe if will make our base strong then it will strengthen building blocks in the journey of Swarnim Bharat. And that foundation is our education system.

Our leadership at state and central level are doing very well to deal with all the hurdles that are in our path towards Swarnim Bharat.

But these are some few areas which could be looked upon where strong foundation of education could be really helpful.

## 1) Population:

- As we all know that increase in population could be a biggest hurdle in our dream toward vikshit Bharat at 2047.
- We might be having the highest population in world at 2047 (swarnimkal).
- Government might bring a policy on population control to meet the demand and supply for the citizen of our country, and it is need of hour.
- We might be having biggest manpower in the world, if we want to fulfill our dream for Swarnimkal, then this manpower could be our assets rather than liability, if we can use it wisely.
- Skill based, leadership base, character building training etc., in education can pay very important role to eradicate this hurdle. We can lead the world by proper utilization of skills and knowledge of our strong manpower.

## 2) Increase of Tax base (% Of Population paying tax has to be increased):

- As we all know that only around 10% of people in our country are paying income tax. The Scenario is 10 people are earning for a family of 100 people.
- To meet the total budget of our country, need has arisen to increase the tax base.
- We need to thought for a ways, so that we can increase the per capita income of each and every individual and make them to come under taxable slabs.

- Another thing to make people aware to pay the taxes this is particularly applicable for the unorganized sectors.
- Education plays very important role in this problem, if we have skilled based manpower, apart from Indian companies our talent can attract lots of MNC to our country or if our manpower is ready to lead then we can increase our own new entrepreneur base to meet our country need.

### 3) Free Virus:

- We had successfully fought with the COVID-19 Virus but our society is suffering from another Virus called as Free Virus.
- We need to make understand, each and every citizen of our country that nothing is free and free is costlier.
- This free virus if not dealt upon could be the biggest hurdle in our journey towards Swarnim Bharat.
- If People of our country create a habit of getting everything free then nobody likes to work.
- Lots of people of our country are losing their hard earned money due to on-line fraud only because of greed of getting something free.
- Quality in education can play a pivot role to challenge this problem.
- Proper education on these topics from school days could be very helpful.

### 4) Black money:

- Even after successful demonetization, today we see ED is seizing lots of black money in cash from x,y,z.
- Here also character based education plays an important role.
- One solution to these problems is digital currency, it is started but in current date this project is at pilot level, but till 2047 I think it will be only currency in used.
- Another solution, till digital currency is available to each and every individual of our country, print, currency notes with expiry date. After expiry date this currency notes

# Vidhyayana - ISSN 2454-8596

An International Multidisciplinary Peer-Reviewed E-Journal

Indexed in: Crossref, ROAD & Google Scholar

will become paper. Hence nobody will store it for long time it has to come out any way before expiry date.

- Here also a proper training (especially from parents and teacher) is very important.

## **Final Conclusion:**

All our Dreams of Swarmim kal will be fulfilled if we identify the gaps in existing education system and properly rectify these gaps.

We need to continuously work upon to developed the society through quality education (Holistic upbringing of a Children's) & skill development to innovate new things, coupled with some liberal government policies to attracts new business, investments and Innovations.
